

SAME-DAY CROWNS

Our office is **digitalized** to make crown from intraoral scanning to milling.

SCANNING the MOUTH

No impression required

Intraoral scanner create high-quality digital impressions in realistic colors. Seeing your dentition on screen in color activates quality dialogue with doctor.

DESIGNING CROWN

We scan every patient every time to track changes, identify dental conditions sooner.

MILLING of CROWN

No temporary crown required

High-performance mill offers same day service. Permanent crown is created, crafted and fitted in just one visit, thus saving time and stress.

PRINTING of DENTAL MODEL

Flawless printing provides prototyping the fast turn-around time and to deliver accurate.
